---

## Professional Experience

### 2016 to date

- **doValue**  
He joined doValue as Chief Executive Officer and led the turnaround, IPO, strong AUM and profitability growth of the company. Today, with 165 bn of asset under management, doValue is the undisputed leader in the Non-performing Exposure market in southern Europe (Italy, Spain, Greece and Portugal).

### 2015 (from May to November)

#### General Manager at Fincantieri

### 2013-2015

- **Sorgenia**  
As Chairman and Chief Executive Officer, he successfully ran the financial restructuring and operational turnaround of this electricity generation company, the biggest non-performing borrower in the country with approximately €3 bn net debt.

### 2009-2013

- **Telecom Italia**  
He joined Telecom Italia as Group Chief Financial Officer. From 2009 to 2010, in addition to the position of CFO, he was Executive Chairman of TI Sparkle, the company responsible for the management of Telecom Italia's international network and wholesale business. He left the Group Chief Financial Officer position in 2012 and became Managing Director for International Business (Tim Brazil, Telecom Argentina and TI Sparkle) and Chief Executive Officer at TIM Brazil.

### 1995-2009

- **Acea**  
From 1995 to 1998 he was responsible, as Head of Finance, for the IPO of the company. From 1998 to 1999, when he became Chief of Strategy, he was head of Planning and Control. In 2001 he became Chief Financial Officer and Chief Executive Officer from 2003 to 2009.
- Before Acea he worked for the InterAmerican Development Bank (IDB) where he dealt with restructuring and privatisation projects in Argentina and Brazil.

## Education

He graduated at the University of Rome in 1988 with a thesis on Evaluation and financing of private investments in public infrastructure.

## Experience in the Renewable Energy Industry

From 2009 to date he is founding shareholder (33%) of Byom and Chairman of the company.

Byom's main activities are:

1. construction project management of renewable energy plants (approximately 70MW of PV power plants),
2. structuring and financing of investment in PV power plants and wind farms (Byom planned and negotiated project finance and leasing contract for approximately €400 m),
3. direct investment, with a controlling stake in SPVS with a 31MW total portfolio,
4. operational management (145MW under management),
5. technical management, supporting renewable energy companies in dealing with Terna and the electricity distribution companies (connections, technical standard etc.) and energy services companies (compliance with the feed-in tariff regulation, performance monitoring etc.).

From 2013 to 2015, while Chief Executive Officer at Sorgenia, he sold approximately 50MW of renewable energy to Glenmont and MacQuarie.

As Chief Executive Officer of Acea, he launched the PV investment plan of the company. An important component of the PV portfolio was subsequently sold to Terra Firma.

## Other

He is fluent in English and Spanish.
